LEADING EDGE GENETICS

New date & location!

BULL & FEMALE SALE

FEBRUARY 2, 2017 - 1:00 PM

AT THE POSS RANCH IN SCOTIA, NEBRASKA

151 YEARLING BULLS | 27 FALL BULLS | 22 TWO-YEAR OLD BULLS | 40 ANGUS HEIFERS

Welcome POSSANGUS.COM

Dear Friends and Cattle Producers,

It's hard to believe that another sale day could be here already, and this one proves to be a historic one for our family. With a lot of discussion and weighing our options, it turns out this will be a year of big changes. It has always been our goal to host our sale at the Poss Angus Ranch, and we finally came to the conclusion, that this is the time. While changing the sale location, we also decided to finalize a decision we have been throwing around for several years, a **NEW SALE DATE!** Although we feel a bit overwhelmed, we know these decisions are best for our customers, our cattle, our family, and the future of Poss Angus. So, it is with great anticipation that we invite you to join us on **Thursday, February 2nd, 2017 at the Poss Angus Ranch in Scotia, Nebraska** for our sale and complimentary lunch. We will also host a post-sale gathering at the sale facility featuring CAB prime rib and refreshments.

Although the location and date of the sale may be different, the passion we have for the Angus industry and our loyalty to our customers remains constant. We continue to work hard to bring you high maternal, moderate framed, docile females with great udder quality. To give you the best bull you can get for your money, we have utilized DNA testing to provide you with genomic enhanced EPDs. Yearling bulls will be ultrasounded before sale day. Updated EPD's will be available on our website after Friday, January 27th. All genomic data is incorporated in the EPD's, which were last updated on 1-6-17. As always, all bulls are guaranteed against injury or death through the first breeding season. Our guarantee is outlined on the following page. We will winter the bulls at no charge until the middle of March, at which time we will begin free delivery.

As we invite you to our home place, we are grateful for the friendships we have developed through our business and we sincerely thank you for being a part of the progression we have been fortunate to have over the last two and a half decades. If there is anything we can do to assist you, feel free to give us a call and we can visit about your program and how Poss Angus can be a source of powerful genetics for your herd. If you are new to our program, we look forward to getting to know you and the needs of your cattle.

Everyone is welcome to join us on **Wednesday, February 1st** to preview the bulls, as well as a producer meeting featuring Multimin and Geneseek at 6:00 PM, with a meal provided. The sale will be held on **Thursday, February 2nd** at Poss Angus outside of Scotia, Nebraska, with a complimentary lunch on sale day. You are also invited to a post-sale get together featuring CAB prime rib and refreshments after the sale in our sale facility.

GUARANTEE

Unconditional first breeding season guarantee against death or injury to all bulls. Breeding season is defined as the 90-day period following the first turnout of the bulls. Replacements are available, or if the buyer prefers, credit will be given in the following year's sale. Please notify us as soon as possible after injury and prior to the sale of the injured bull. All claims must be made by October 1st.

PHONE BIDS Phone bids will be handled in a confidential manner. If you are unable to attend the sale, please contact Dan or Nolan prior to February 1st so they can assist you during the sale to make your purchase.

TERMS AND CONDITIONS

Poss Angus assumes no liability in case of an accident. All cattle will sell under the terms and conditions recommended by the American Angus Association.

SEMEN EVALUATION

All bulls will have a breeding soundness evaluation done in early March by a qualified veterinarian and will be accompanied by proper certificates.

TRUCKING ARRANGEMENTS

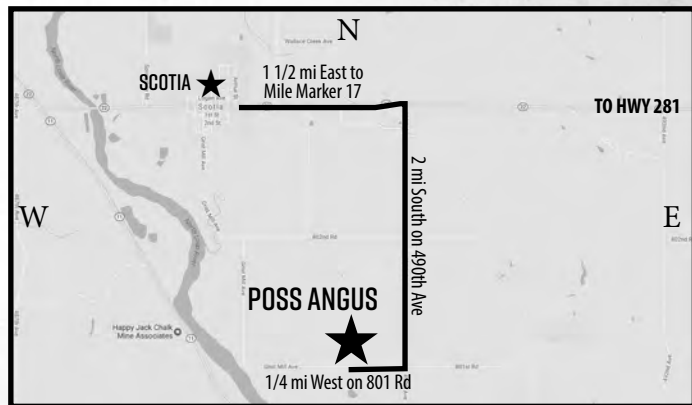

Bulls will be wintered until mid-March at which all bulls will be delivered within 400 miles free of charge. Heifers can be picked up sale day or within a week of the sale.

HERD HEALTH

Bulls and heifers have been vaccinated for P13, BVD, BRSV, Haemophilus, Vibrio, Lepto and 7-Way. Bulls and heifers have also been wormed for internal and external parasites. Heifers have been Bangs vaccinated.

POSS ANGUS SEMEN INTEREST

Poss Angus will retain 1/3 interest in all bulls selling. Buyer has full possession and salvage value of the bull.

VOLUME DISCOUNTS 3 HD - 3% | 4 HD - 4% | 5 HD+ - 5%

This sale will be broadcast live on the internet.

DVAuction

Broadcasting Real-Time Auctions

Real time bidding & proxy bidding available.

Video of the bulls will be available on DVAuction two weeks prior to the sale.

AT THE RANCH | SCOTIA, NEBRASKA | POSSANGUS.COM

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires. **Mature Height EPD (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade (\$QG) represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

\$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Baldrige Willie is a very impressive individual phenotypically. He is heavy muscled, square hipped, deep ribbed and a smooth made beef bull with excellent feet and legs. Use Willie for calving ease, outcross genetics with added muscle and great fleshing ability. Daughters are making gentle nice uddered females that are wide based and easy fleshing.

We purchased Western Cut with Genex in the 2013 Connealy Sale as he was the high seller. Western Cut is an outcross sire whose progeny are sharp fronted, clean made, and big topped with excellent feet and leg structure. Daughters are attractive females and his mother is considered as one of the best cows at Connealy's.

Calving ease in an attractive package

A FEW WORDS FROM... *Chris Earl*

Another year in the purebred angus business always brings change. This year at Poss Angus two major changes that I think will really help the customer base is the sale has moved up to early February and also the sale has been moved to the ranch in Scotia. I often tell people you not only buy the animal, you buy the program. Moving the sale to the ranch will give you all a great opportunity to see a true family run operation in full swing. From calving to marketing!

The offering is deep and holds many opportunities for all classes of buyers. The potential herd bulls are calving-ease, have progressive EPD profiles and are genetically out-crossed to many heavily used sires in the breed. These bulls are developed and bred for real world performance. The excellent growth traits are easily seen in this set

of bulls. The bull offering is big with large sire groups to insure consistency. The female offering again is young and with many options for breeders looking to sure up and add to their replacement pen. Gets these females home and watch them grow into excellent cows. I see them all over the country!

As I have mentioned before few breeders work harder in the business then Danny Poss. He is schooled and current on the genetic capabilities of the breed and is fearless in implementing what he feels is best for his customers. Take advantage of his experience and effort and you will be rewarded.

Please feel free to contact me with any questions. The offering will be videoed shortly and all data should be available prior to sale. We appreciate your interest in Poss Angus and please take my word you will not deal with more honest hard working people then the Poss'.

Element was our lead-off and high selling bull in our 2013 sale going to 4M Angus and later sold to Genex. Element transmits consistent calving ease and extreme calf vigor at birth. Element offers mating flexibility to most popular pedigrees. Progeny have explosive growth, style and eye appeal. Daughters are feminine fronted, deep ribbed, gentle, and easy fleshing females with ideal teat size and udder structure.

Capitalist is one of the most powerful, phenotypically impressive made calving ease bulls. His progeny are expressively muscled with excellent body width and depth of rib and flank. Use Capitalist for excellent calving ease and deep ribbed, easy fleshing progeny. Daughters are making powerful square made females with nice udders.

We purchased Resolution in the Mogck Angus Farm 2014 bull sale as their high selling bull. He offers outcross genetics and high maternal genetics for our old customers in a moderate framed package. Resolution also has great eye appeal and balance, and ranks in the top 1% of the breed for \$W. Daughters are making docile females that are soggy made with nice udders.

Lasting Impact was the featured Lot 1 bull of the 2014 sale, selling to Freouf Angus and Jay Palmer. With the Lasting Impact bulls as the leadoff sire group of this year's sale, you will soon realize just how impressive he is.

The amount of muscle mass, performance, eye appeal, and docility that his calves exhibit prove that he is a big time herd bull.

Daughters are top replacement females, and we look forward to calving out the first set of females by Lasting Impact, this spring.

We purchased 3839 as the Lot 1 bull of the 2015 Krebs Ranch Bull Sale.

3839 is an elite calving ease bull, that also adds on extra performance to his progeny.

With his first calves highlighting this sale, the future of his genetics looks very promising.

Cash is a super stout bull, that is big nutted, long bodied, and big topped, that is sure to catch your eye.

We look forward to continuing the use of this great herd sire.

Superior is a previous high selling bull on the 2015 sale, selling to Nichols Angus.

Calving ease and growth with extra rib shape and capacity all in one great package.

The Superior calves continue to impress us, with our first set of calves on this year's sale.

Dam was a profound donor and now works for Cline Angus.

Sensational was a featured lot on our 2015 sale, selling to Jim Lutz
 The first set of progeny to sell by Sensational are well represented in this offering, and prove what kind of eye appeal and performance his calves possess
 Sensational calves are born jet black and show an extreme amount of vigor and growth from the beginning
 Look for this bull to create a legacy that will last for years to come, as we continue to use his exciting genetics

Willie was purchased on the 2012 Baldridge Bros. Sale, and we later sold an interest to Genex
 Willie is believe to be one of the top sons of Waylon, because of his impressive phenotype, and is heavy muscled, square hipped, deep ribbed, and a smooth made beef bull with excellent feet and legs
 Daughters are making gentle nice uddered females that are wide based and easy fleshing
 Sons have topped numerous Baldridge and Poss sales that have gone on to do excellent work for many purebred and commercial operations
 The dam is one of the top cows in the Jud Baldridge herd, that has raised Atlas and Optimum as well

Element was the high selling bull in the 2013 sale, going to 4M Angus and later sold an interest to Genex
 The Element calves are born with extreme vigor at birth, and grow very rapidly
 Element is a big time spread bull with a lot of base width, depth of rib, and muscle expression, not to mention excellent semen fertility and endless mating flexibility with his unique outcross pedigree
 Daughters continue to be some of our best females because of their feminine and broody look, along with their perfectly square udders
 Element continues to be one of the go to heifer bulls for Genex

Easy Rider was the high selling bull of our 2016 sale, as well as the record selling bull at Poss Angus, selling to Koberstein Angus and ST Genetics

Easy Rider is one of the most intriguing outcross spread bulls you will find, due to his impressive phenotype and eye catching numbers

The dam of Easy Rider is one of our favorite cow's and continues to produce extremely well as a donor

We are extremely excited to use Easy Rider very heavily within our herd for the next generation

Compass was purchased last winter on the Baldrige Sale with Accelerated Genetics, as he highlighted the sale with his flush brothers. Compass was a part of the "Big 8" flush that swept the sale season last year, and has been notified as one of the most significant flushes in Angus history. Compass is a big time spread bull, with a big top, square hip, wide based, and excellent feet, not to mention the mating flexibility of his pedigree. His dam is notably one of the most influential cow at Baldrige's, that has produced numerous daughters and herd bulls that have gone on to do big things. A maternal brother, Colonel, will sell in January, and is believed to be the most hyped bull of the 2017 sale season. Contact Accelerated Genetics or Poss Angus for semen.

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 7-24 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	24	Docility	11
Birth Weight	13	Heifer Pregnancy	22
Weaning Weight	19	Mature Weight	16
Yearling Weight	24	Mature Height	7
Milk	14	Carcass Weight	7
Yearling Height	12	Carcass Marbling	8
Yearling Scrotal	16	Carcass Ribeye	11
Dry Matter Intake	17	Carcass Fat	12

How do you know if EPDs are genomic-enhanced?

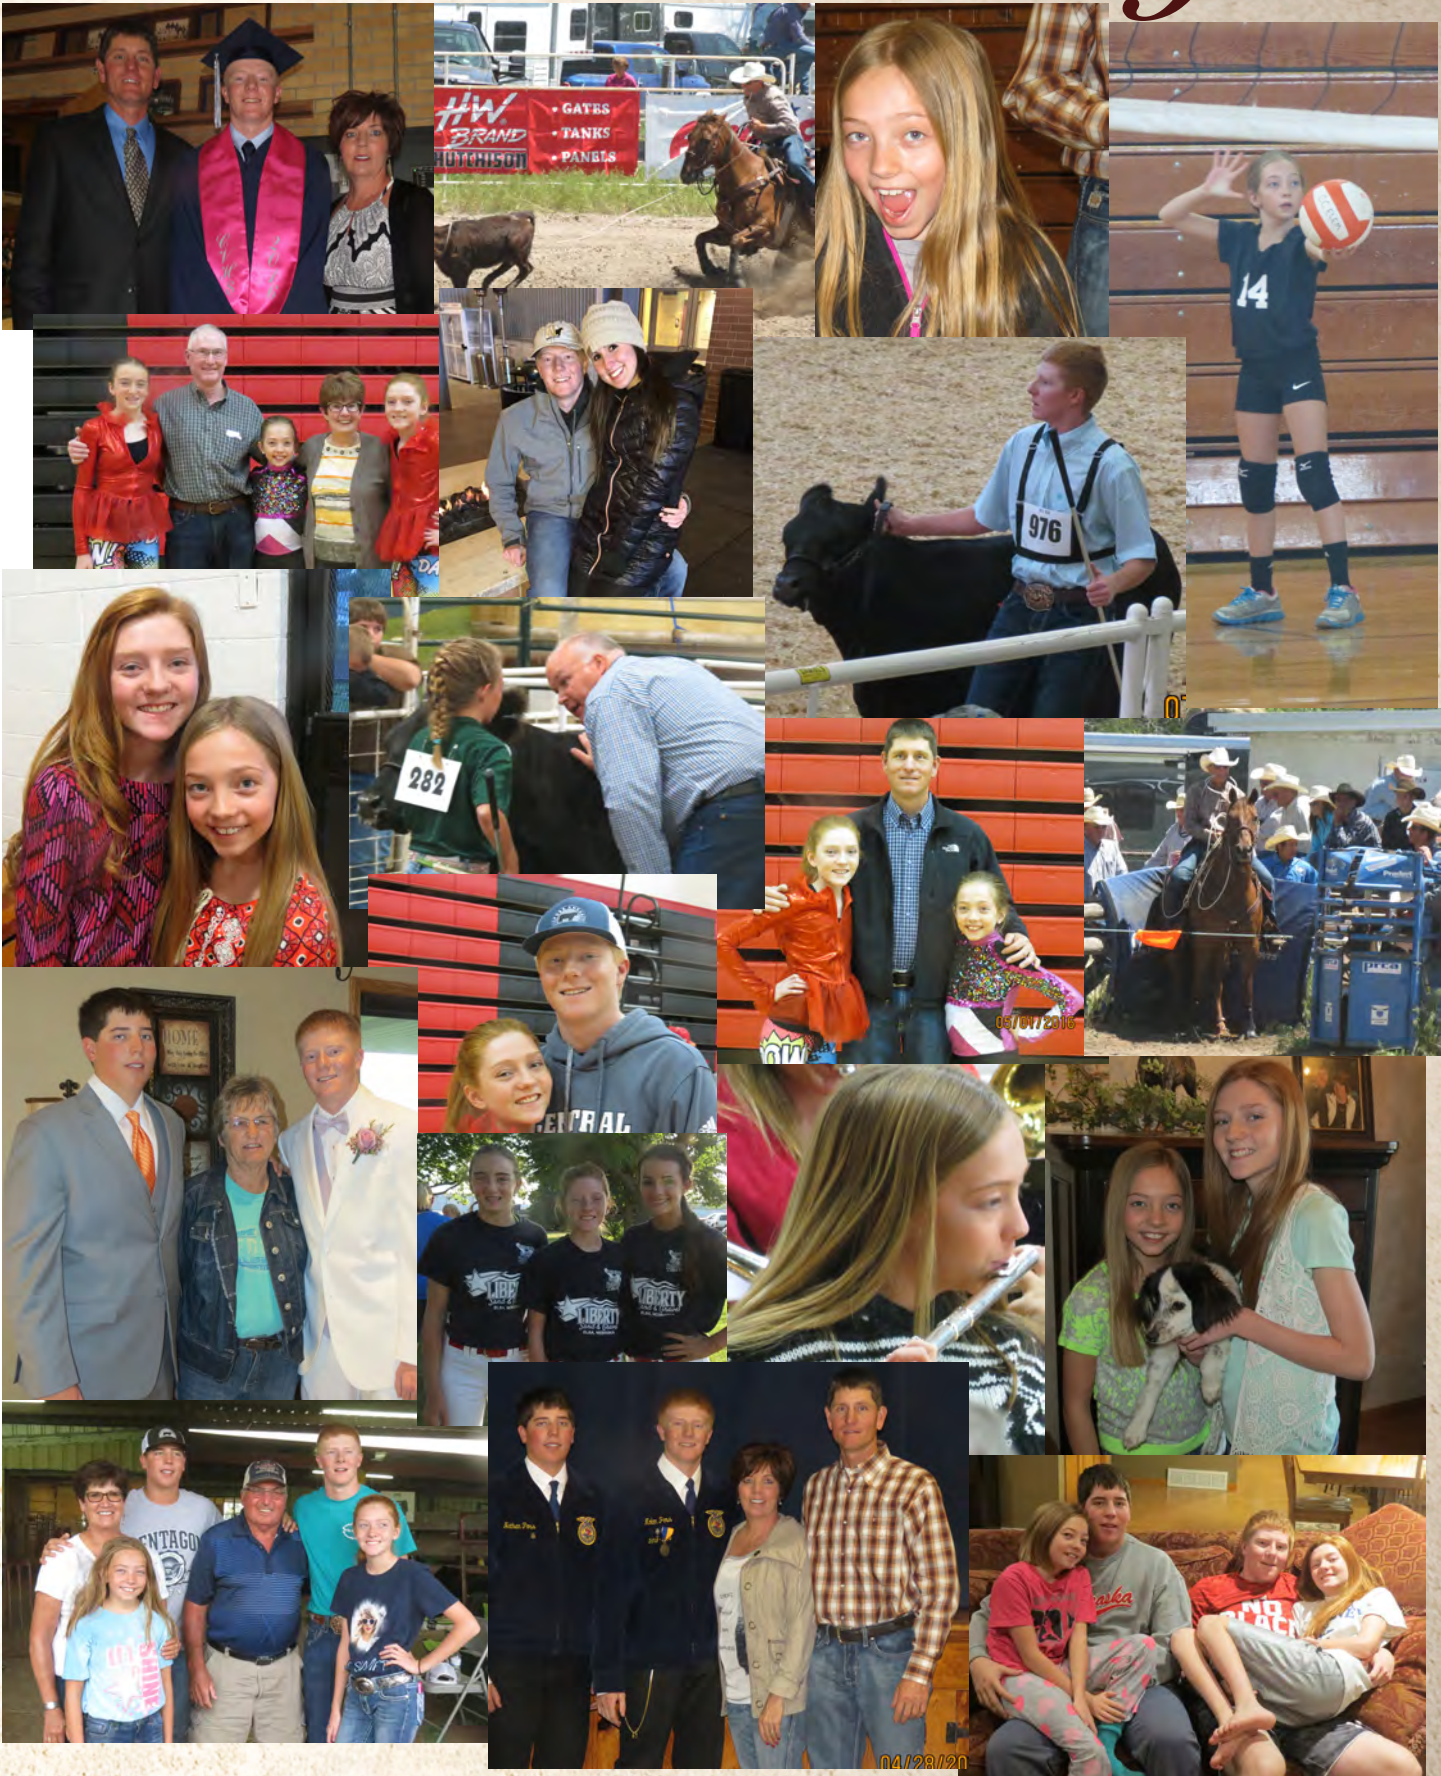

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo or those of partnering labs Zoetis (HD50K, i50K) or GeneSeek (GGP-HD, GGP-LD). These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.
