Welcome

CREATIONS
PHOTOGRAPHY

Dear Friends and Cattle Producers,

Another wonderful year has gone by and another sale day is upon us. As a senior in high school, it has been a privilege for many years to be a part of the everyday activities that make sale day possible. We are certainly excited about what we have to offer you in 2018! On behalf of everybody at Poss Angus, I would like to thank you for taking the time to check out this year's offering. Some of you are considering our genetics for the first time and others have become long time customers and very good friends. Last year, as we hosted our first sale at the ranch, it was one of the best sale days I can remember. Although the cattle, the genetics, and our program are at the top of the priority list, I have to say that it is the friends, the cattle producers, and the family that walk through the door on sale day that make all the long hard days worth it! My family has been blessed!

My dad has expected excellence for as long as I can remember. With every year, he expects growth in all aspects of our business, but the main mission has pretty much been the same. He has impressed upon us the importance of raising cattle with **Leading Edge Genetics** that provide you with calving ease, growth, carcass traits, and most of all, efficient and highly maternal females, that we hope allow you to sell your own top quality cattle. I've watched him stand by a guarantee time after time that makes me proud to be a part of this operation. If there is a problem in the first breeding season with death or injury, you need to talk to him, and he will take care of you to the best of his ability. He has also taught us to utilize DNA testing with genomic enhanced EPD's to give you the best bull you can get. We have continued to ultrasound each bull for carcass traits, which are incorporated into the EPD's.

There are a few highlights I wouldn't want you to miss out on:

1. **Thursday, February 1st** - Come to preview the bulls before dark and then join us for our annual Indian Taco Dinner and presentation by Kelly Retallick of Angus Genetics Inc. (AGI)
2. **Friday, February 2nd** - Join us for sale day at Poss Angus outside of Scotia. My mom will make sure you get a great lunch and my parents would like you to join us for a post-sale gathering featuring CAB prime rib and refreshments.
3. Stick around for the heifer sale! Not only will we be selling four elite donors but with any luck at all, my dad will let me take the microphone for the selling of the last ten heifers!

We are excited to have another sale at our home place and are grateful to the friends, family, customers, and especially our team who make this day happen. If there is any way we can be of assistance to you before sale day, please feel free to call and we can visit about your program and how Poss Angus can be a source of powerful genetics for your herd. Once again, we hope to see you on Friday, February 2nd at the Poss Angus Annual Bull and Female Sale!

GUARANTEE

Unconditional first breeding season guarantee against death or injury to all bulls. Breeding season is defined as the 90-day period following the first turnout of the bulls. Replacements are available, or if the buyer prefers, credit will be given in the following year's sale. Please notify us as soon as possible after injury and prior to the sale of the injured bull. All claims must be made by October 1st.

PHONE BIDS Phone bids will be handled in a confidential manner. If you are unable to attend the sale, please contact Danny or Nolan prior to February 1st so they can assist you during the sale.

2018 Annual Bull and Female Sale

FEBRUARY 2, 2018

1:00 PM CST

At The Ranch Near Scotia, Nebraska
48981 801st Road | Scotia, NE 68875

Please note the sale is now on Friday!

TERMS AND CONDITIONS

Poss Angus assumes no liability in case of an accident. All cattle will sell under the terms and conditions recommended by the American Angus Association.

SEMEN EVALUATION

All bulls will have a breeding soundness evaluation done in early March by a qualified veterinarian and will be accompanied by proper certificates.

TRUCKING ARRANGEMENTS

Bulls will be wintered until mid-March at which all bulls will be delivered within 400 miles free of charge. Heifers can be picked up sale day or within a week of the sale.

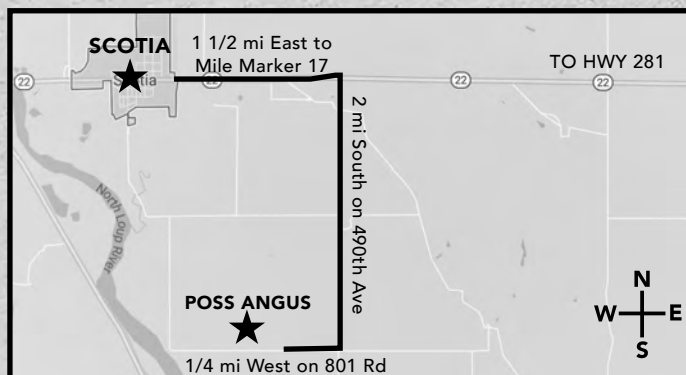

HERD HEALTH

Bulls and heifers have been vaccinated for P13, BVD, BRSV, Haemophilus, Vibrio, Lepto and 7-Way. Bulls and heifers have also been wormed for internal and external parasites. Heifers have been Bangs vaccinated.

POSS ANGUS SEMEN INTEREST

Poss Angus will retain 1/3 interest in all bulls selling. Buyer has full possession and salvage value of the bull.

VOLUME DISCOUNTS 3 HD - 3% | 4 HD - 4% | 5 HD+ - 5%

This sale will be broadcast live on the internet.

DVAuction
Broadcasting Real-Time Auctions

Real time bidding & proxy bidding available.

Video of the bulls will be available on DVAuction two weeks prior to the sale.

Join us!

BREEDING CATTLE FOR TOMORROW'S INDUSTRY

Kelli Retallick
Director of Genetic Services
Angus Genetics, Inc.

From within herd ratios, EPDs to genomic testing, cattle selection has evolved in many ways over the years. But one thing remains true, all of these tools aim to do one thing - produce better cattle for the next generation. Kelli Retallick, the director of genetic services for Angus Genetics, Inc. will discuss the most recent enhancements to the American Angus Association's weekly genetic evaluation, how they are making EPDs better, how they affect you as a producer and what is on the horizon for the future of the Angus breed.

THURSDAY, FEBRUARY 1ST | 6:00 PM
AT POSS ANGUS

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

maternal

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

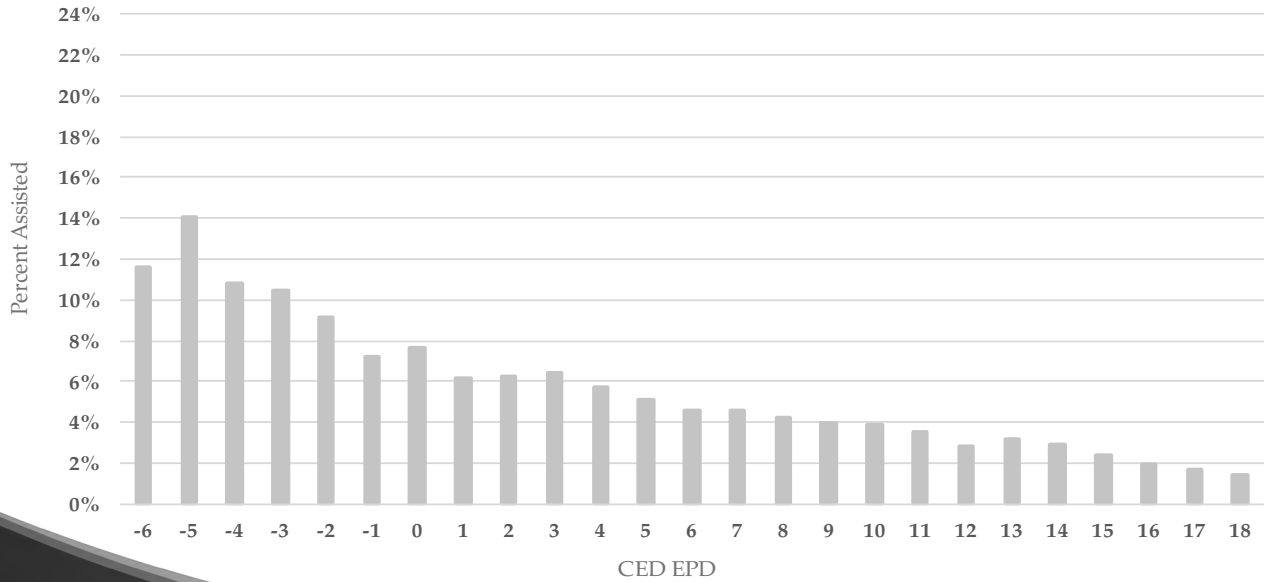

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Incidence of Calving Difficulty

20 highest accuracy sires born since 1995 for each unit of CE EPD

A real dandy to start the offering with unspeakable potential in this AI stud prospect! 764 is the #3 \$B and #5 Marbling son of 1682 calves among non-parent bulls and top 10% for SC EPD. Not only is he elite on paper but he's one of a kind in person. Thick and stout from the ground up and base width that is apparent. When you look at how much lower quarter, dimension, and depth of rib this guy has it's so hard to be able to resist just how amazing he truly is. With unreal maternal excellence, be sure to keep every female out of him. The dam is a long fronted, level hiped, long bodied, and just an all-around attractive female. We are excited to offer such a high caliber bull and truly believe this is the best one we have ever offered. 764 will see heavy use in our herd, and believe that his progeny will be able to rise to the top just like he did.

Ranked #6 among all Angus sires for progeny registered in 2017. This high volume, easy fleshing individual is one of the bulls that cattlemen come to see at ORigen and one of the highest demand sires in the 15 year history of ORigen. Few calving-ease bulls in Angus history have ever offered the extreme body mass and depth of body that is a trademark of Payweight 1682 and his progeny. Payweight 1682 daughters in production display his depth of body and ease of fleshing with nice udder structure and a brood cow look.

Moderate framed, real muscular, super powerful, wide based and full of red meat; what's not to love about another great 1682 son! This guy can and will do it all for anybody. You'll really appreciate the eye appeal in this stud that comes from a super attractive Uptown daughter.

Moderate framed and strong topped with excellent calving ease from this 1682 son. Dam is out of one of our favorite mating's and a full sister to the high selling Element son in last years' sale.

Compass was purchased on the Baldrige Sale with Accelerated Genetics, as he highlighted the sale with his flush brothers. Compass was a part of the "Big 8" flush that swept the 2016 sale season, and has been notified as one of the most significant flushes in Angus history. Compass is a big time spread bull, with a big top, square hip, wide based, and excellent feet, not to mention the mating flexibility of his pedigree. His dam is notably one of the most influential cows in the nation, that has produced numerous daughters and herd bulls that have gone on to do big things. Compass is a maternal brother to Colonel, Bronc, Beast Mode, 38 Special, and 8 Ball. The first calves have exceeded our expectations and it looks like his daughters will very closely resemble his great mother because of their deep body and feminine look, keep every daughter you get.

Element was the high selling bull in the 2013 sale, going to 4M Angus and later sold an interest to Genex. The Element calves are born with extreme vigor at birth, and grow very rapidly. Element is a bull with a lot of calving ease, base width, depth of rib, and muscle expression, not to mention excellent semen fertility and endless mating flexibility with his unique outcross pedigree. Daughters continue to be some of our best females because of their feminine and broody look, along with their perfectly square udders. The first calves by Element daughters are seen throughout this offering. Element continues to be one of the go to heifer bulls for Genex.

Contact Genex for semen

Younger bull here, but don't let that fool you! Stout made and dog gentle, don't miss this one, look him up! Elite growth numbers with superb \$ figures and carcass traits. Dam is a beautifully uddered Right Answer daughter that sure knows how to raise one.

A FEW WORDS FROM... *Chris Carl*

Family in genetics and business has always been a place that I like to start for decision making. The Poss family is one of the most rewarding relationships I get to see and learn from on my travels. Their passion for honesty, angus genetics, spending time together, faith and work is inspirational. These are the characteristics of a genetic program you can trust.

The offering is the best to date in the time I have been involved. The bulls are more even, heavier muscled and docile. The EPD profiles continue to better reflect the superior performance genetics I believe are in the foundation of the cowherd. The sire selections reflect the family's commitment to being progressive and forward thinking. This is for your benefit in the pasture and in the feedlot. The lot 1 bull is a quite a package. Nothing is more difficult right now then to produce top percentile performance cattle in a moderate, thick and

wide based stature. They did it with him and his genetic promise looks real and unlimited. He is the real deal!

The female offering has really stepped up this year with donors on the front end and top end replacements right behind them. The female offering holds purebred promise in the young females' and proven productivity in the donors. You will like what you see in the donors and the mating flexibility they offer with their outstanding phenotype.

As I have mentioned before few breeders work harder than the Poss family. They are fearless in their commitments and humble in their success'. You can trust your investment in this program. I guarantee it! If I can be of assistance please feel free to contact me or Wes. Look for the videos to be up on DVAuction.com and we hope to see you at the sale.

Fortress wraps pedigree, performance and phenotype into a proven package that offers mating flexibility. Consistently sires strong calves of both sexes with low birth weights and excellent vigor at birth. Adds depth of body and doability in a sound-structured, high-performance package. Unique pairing of \$W and \$B with birth to yearling spread like no other.

Sudden Impact was the second high selling bull of the 2016 sale, selling to Hedgewood Prairie of Kansas. Sudden Impact is the most powerful Easy Impact son that we have raised, due to his impressive muscle expression, and eye catching performance data. Check out the spread on this guy along with his genomic profile, and you will realize he is one of the best. The first calves by Sudden Impact are here and boy are they good! Loads of muscle, with a killer look, they're everything we expected them to be and more! Sudden Impact is also a flush brother to Easy Rider, the all-time high selling bull of Poss Angus.

Contact Poss Angus for semen!

Discovery is a rare genetic package with moderate birth, extreme growth and elite carcass traits. No other proven sire can match his combination of \$W and \$B. His progeny have been highly sought after in sales throughout the United States. His sons are muscular and masculine. His daughters are feminine and broody. He was the lead off and high selling bull of the 2013 Vintage Angus Ranch Bull Sale, CA.

Lot 80

Highest performing and most powerful bull ever offered at Poss Angus! When you look at his muscle mass and volume you will be amazed by this scale crusher, a real standout since day one! This bull caught the eye of everyone who viewed him this summer, and was a favorite every bit of the way. With a weaning ratio of 125 on a first calf Element daughter, his mother is equally as impressive. Neat in her design and powerful in her look, these are the type of daughters we strive to produce!

Sensational was a featured lot on our 2015 sale, selling to Jim Lutz. The second set of progeny to sell by Sensational are well represented in this offering, and prove what kind of eye appeal and performance his calves possess. Sensational calves are born jet black and show an extreme amount of vigor and growth from the beginning. Look for this bull to create a legacy that will last for years to come, as we continue to use his exciting genetics. Our first daughters by Sensational will calve this winter, and look to carry the same look as the long line of proven dams in his pedigree. **Contact Poss Angus for semen**

Lasting Impact was the featured Lot 1 bull of the 2014 sale, selling to Freouf Angus and Jay Palmer. The amount of muscle mass, performance, eye appeal, and docility that his calves exhibit prove that he is a big time herd bull. The first Lasting Impact daughters to calve are the real deal, with perfect udders and a feminine look.

A full brother to the high selling bull in last year's sale going to Sitz Angus and ABS, Poss Achievement. This bull resembles his full brother well, but with more growth and performance. Achievement is one of the top calving bulls in the ABS lineup and will sire awesome females, and we think 7162 will do much of the same. This bull is very correct made and super wide based, much like his brother, and has been a favorite all his life. This bull will not disappoint you! Dam is one of the most powerful and eye appealing Broken Bow daughters out there. Get in on this special bull, this mating is bred for excellence.

Willie was purchased on the 2012 Baldrige Bros. Sale, and we later sold an interest to Genex. Willie is believed to be one of the top sons of Waylon, because of his impressive phenotype, and is heavy muscled, square hiped, deep ribbed, and a smooth made beef bull with excellent feet and legs. Daughters are making gentle nice uddered females that are wide based and easy fleshing. Sons have topped numerous Baldrige and Poss sales that have gone on to do excellent work for many purebred and commercial operations. The dam is one of the top cows in the Jud Baldrige herd, that has raised Atlas and Optimum as well.

If you're lookin for an attractive and correct made Traction son this is the bull. A real power house that you're sure to find. Easily a favorite of this sire group by many. It's hard to find a bull with this much power and performance backed by such strong maternal power. The dam of this stud is a no miss cow. Every calf produced by this female is a good one. The mother is also the dam of Bodyguard, the phenotypic standout in the 2015 sale that is in the Accelerated Genetics lineup.

Flushed 2 times for an average of 6 transferable eggs

Poss Blueblood 2135 is a phenotypic standout, that easily earned herself a spot in our donor pen. This cow has maternal dominance in her pedigree, reigning from her famous dam. The now deceased dam, Blueblood 920, was considered by many to be one of the top All Around daughters in the breed. This cow definitely lived up to the expectations left by her dam to carry on the legacy. Her daughter, Blueblood 410, is currently our go to donor, and has been viewed by many astute cattlemen to have near perfect phenotype with a great EPD spread. With a WR 2/109 and YR 2/107, this proven outcross female will work in anybody's herd. Lots 41, 42, and 47-49 are herd sire prospects by Element and direct sons of 2135, that headline this event. Get in on this proven female to strengthen your donor pen! **Donors sell open and ready to flush.**

Ellunamere 5507 is a herd treasure and second generation donor female, that is a once in a lifetime opportunity to dive right in to the Poss Angus donor pen and take a top tier female. The potential with this up and coming female are endless. Elite spread numbers with WW, YW, CW and \$B all in the top 1% of the breed, not to mention CED, HP, and \$W in the top 10% of the breed. With an outcross pedigree, impeccable stature, eye popping EPDs, and curve bending genetics; this female will become well known to the entire breed, as well as exactly what we all have been waiting for. A flush brother, Poss Irresistible 3541, was a 2014 sale feature bringing \$15,500 to Richard Hanrahan, IA. This is the first time in Poss Angus history, that a daughter of the deceased Easy Impact, will be sold. Don't miss out on the opportunity to get in on not only a herd improver, but a breed changer. **Donors sell open and ready to flush.**

Queen Peggy 5141 is a low birth weight Earnan daughter in a moderate frame. This easy fleshing female raised an Element daughter for her first calf that had a WR 1/110, and earned herself a spot in our replacement pen. This cow family stems back to the ever-famous Queen Peggy cow family in the Baldrige Bros. program. With a pedigree backed by maternal powerhouses on top and bottom, this cow will give a unique and fresh genetics to anyone's donor pen. **Donors sell open and ready to flush.**

Blackcap 5194 is a moderate framed Discovery daughter we acquired as a heifer calf from the elite Vintage program. This Discovery daughter portrays lots of performance and growth with added carcass merit. Her EPD's and genomic figures will certainly catch your attention, but wait till you see her in person! With a brood cow look, depth of body, and added capacity; this cow will catch anyone's eye from a mile away. 5194 was a top notch and reliable donor for us, always producing an excellent amount of eggs. We are extremely confident she will be able to do the same wherever she may end up. **Donors sell open and ready to flush.**

Compass was purchased on the Baldrige Sale with Accelerated Genetics, as he highlighted the sale with his flush brothers. Compass was a part of the "Big 8" flush that swept the 2016 sale season, and has been notified as one of the most significant flushes in Angus history. Compass is a big time spread bull, with a big top, square hip, wide based, and excellent feet, not to mention the mating flexibility of his pedigree. His dam is notably one of the most influential cows in the nation, that has produced numerous daughters and herd bulls that have gone on to do big things. Compass is a maternal brother to Colonel, Bronc, Beast Mode, 38 Special, and 8 Ball. The first calves have exceeded our expectations and it looks like his daughters will very closely resemble his great mother because of their deep body and feminine look, keep every daughter you get.

Revolution was the high selling fall bull in last year's sale, selling to Howard Schmidt. Revolution caught the eye of many cattlemen because of how powerfully built he was, as well as his impressive structure. The dam of Revolution stems from the famous Blackcap cow family, that goes back to the same family that brought us Total Impact. We used Revolution heavily last year based on the excellent cow family and impeccable phenotype and structure, look for his calves to be on next years sale.

Achievement was the high selling bull on last year's sale, going to Sitz Angus and ABS. Achievement is a fault free bull with a strong top, perfect feet, deep bodied, and wide based. Achievement is one of the top spread bulls in the ABS lineup, where you really appreciate the amount of calving ease, growth and carcass merit he portrays. With a BR of 89 to a YR of 118, it goes to show that you really can have calving ease and growth all in one. Ratioing a 129 on IMF and a 110 on RE, adds to the fact that there isn't a hole in him. The dam is one of the top Broken Bow daughters, that catches your eye from a mile away with a great look.

Easy Rider was the high selling bull of our 2016 sale, as well as the record selling bull at Poss Angus, selling to Koberstein Angus and ST Genetics. Easy Rider is one of the most intriguing outcross spread bulls you will find, due to his impressive phenotype and eye catching numbers. The dam of Easy Rider is one of our favorite cow's due to her always producing a great one. We look forward to receiving our first set of Easy Rider calves this winter.

Bodyguard was a featured lot in the 2016 sale, selling to Accelerated Genetics, Woodhill Farms, Baldrige Bros, and Lowery Land and Livestock. Bodyguard is one of the thickest, stoutest, and most complete bulls ever raised here. Look for the progeny of Bodyguard to exhibit the same characteristics as their sire. Reports on the first Bodyguard calves were that he stamps his progeny with a great look, muscle expression, and no white.

Sudden Impact was the second high selling bull of the 2016 sale, selling to Hedgewood Prairie of Kansas. Sudden Impact is the most powerful Easy Impact son that we have raised, due to his impressive muscle expression, and eye catching performance data. Check out the spread on this guy along with his genomic profile, and you will realize he is one of the best. The first calves by Sudden Impact are here and boy are they good! Loads of muscle, with a killer look, they're everything we expected them to be and more! Sudden Impact is also a flush brother to Easy Rider, the all-time high selling bull of Poss Angus.

Element was the high selling bull in the 2013 sale, going to 4M Angus and later sold an interest to Genex. The Element calves are born with extreme vigor at birth, and grow very rapidly. Element is a bull with a lot of calving ease, base width, depth of rib, and muscle expression, not to mention excellent semen fertility and endless mating flexibility with his unique outcross pedigree. Daughters continue to be some of our best females because of their feminine and broody look, along with their perfectly square udders. The first calves by Element daughters are seen throughout this offering. Element continues to be one of the go to heifer bulls for Genex.

Lasting Impact was the featured Lot 1 bull of the 2014 sale, selling to Freouf Angus and Jay Palmer. The amount of muscle mass, performance, eye appeal, and docility that his calves exhibit prove that he is a big time herd bull. The first Lasting Impact daughters to calve are the real deal, with perfect udders and a feminine look.

SAV Revive was a feature of the Renown sire group in last year's record breaking sale. Revive is an attractive, super-fronted bull with length, thickness, muscle shape and superior structure. Revive is a high performing bull that reads well on paper across the board. His dam is a beautiful Iron Mountain daughter who is a maternal sister to Hesston.

Teddy swept the nation last year when he became the record breaking bull of the Edgar Brothers program. We were able to team up with Matt Lowery to purchase this once in a lifetime masterpiece. This eye catcher is truly a bull every cattleman strives to produce, based on his excellent phenotype, unbelievable power and thickness, base width, and sound structured. If you're looking to add power and growth to your cattle without sacrificing maternal excellence, look to use Teddy, you won't be disappointed. The dam of Teddy is a total brood cow that is a picture perfect granddaughter.

Sensational was a featured lot on our 2015 sale, selling to Jim Lutz. The second set of progeny to sell by Sensational are well represented in this offering, and prove what kind of eye appeal and performance his calves possess. Sensational calves are born jet black and show an extreme amount of vigor and growth from the beginning. Look for this bull to create a legacy that will last for years to come, as we continue to use his exciting genetics. Our first daughters by Sensational will calve this winter, and look to carry the same look as the long line of proven dams in his pedigree.

Willie was purchased on the 2012 Baldrige Bros. Sale, and we later sold an interest to Genex. Willie is believed to be one of the top sons of Waylon, because of his impressive phenotype, and is heavy muscled, square hiped, deep ribbed, and a smooth made beef bull with excellent feet and legs. Daughters are making gentle nice uddered females that are wide based and easy fleshing. Sons have topped numerous Baldrige and Poss sales that have gone on to do excellent work for many purebred and commercial operations. The dam is one of the top cows in the Jud Baldrige herd, that has raised Atlas and Optimum as well.

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 7-24 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	24	Docility	11
Birth Weight	13	Heifer Pregnancy	22
Weaning Weight	19	Mature Weight	16
Yearling Weight	24	Mature Height	7
Milk	14	Carcass Weight	7
Yearling Height	12	Carcass Marbling	8
Yearling Scrotal	16	Carcass Ribeye	11
Dry Matter Intake	17	Carcass Fat	12

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo or those of partnering labs Zoetis (HD50K, i50K) or GeneSeek (GGP-HD, GGP-LD). These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.
