POSS ANGUS

LEADING EDGE GENETICS

Annual Bull and Female Sale

Dear Friends and Cattle Producers,

It's hard to believe that it is already bull sale time again! On behalf of my family and everyone else involved with Poss Angus, I would like to thank you for considering our genetics. Whether you have been with us from the beginning, or are considering our genetics for the first time, we feel that we have an offering of bulls that are second to none and will fit the need of any cattlemen. Having been a part of this operation for a considerable time now, I am grateful for the people that I have met through my dad and his business. Their passion and knowledge of the Angus breed has helped me to expand my thinking beyond Poss Angus and has given me the desire to learn more and help my dad in the pursuit of helping others and their operation.

Having been beside my dad for 21 years now, there are several things he has taught me. Although we strive to grow in all areas of the operation every year, the cattleman values he has instilled in me have always remained the same. First and foremost he has taught me to learn from the experienced people around me. Listening to the men who have seen it all, has helped me to think a little differently. He has taught me the importance of breeding and raising cattle with Leading Edge Genetics that provide you with calving ease, growth, carcass traits, and most of all, efficient and highly maternal females. Our goal is to breed cattle that will yield a solid return and leave a quality set of females year in and year out. Dad has also taught me that taking care of our customers is a top priority, watching him stand by a guarantee that is second to none makes me very proud to be a part of this program. If you have any problems in the first breeding season with death or injury, be sure to let us know and he will take care of you to the best of his ability. Your satisfaction is our top priority! The last thing I have learned in my short time, is utilization of the industry's most recent tools. Utilizing tools such as DNA testing with genomic enhanced EPD's, has been very beneficial to our herd, and is one of the key tools in helping you make a better selection based on your needs.

There are a few highlights our crew would not want you to miss out on:

1. **Thursday, January 31st** – Come to preview the bulls, and then at dark take in our annual Indian Taco Dinner as well as a presentation from our nutritionist, Allen Stateler, on maximizing cow-calf profitability.
2. **Friday, February 1st** – Join us for sale day just south of Scotia at the farm. Bulls will be penned by 9 am, and then at noon my mother and sisters will be sure to serve you a great Certified Angus Beef meal. Once the sale is completed our family would love for you to stick around for the post-sale gathering featuring our famous CAB prime rib as well as refreshments.
3. For the second year in a row we will be offering four donors straight from the top of our entire herd. These cows will do a great job for their future homes, their progeny highlight this sale and will continue to do so for the next couple years. We have decided to discontinue selling our open heifers on this sale. This is due to building up our herd in hopes of starting an annual female sale in the next few years!

Our family is excited to host another sale at the ranch, but we are even more grateful for the friends, family, customers, and especially our crew who make this day such a memorable one. If there is any way we can be of assistance to you before sale day, please feel free to call and we can visit about your operation and how Poss Angus can be a source of powerful genetics for your cow herd. We look forward to seeing you on Friday, February 1st at the Poss Angus Bull and Female Sale!

SALE SCHEDULE

Thursday, January 31, 2019

- 1:00 PM - Cattle available for viewing.
- 6:00 PM - Producer meeting "Maximizing Cow/Calf Profitability" with Allen Stateler, Ph.D., Nutrition Services Associates

Friday, February 1, 2019

- 9:00 AM - Cattle available for viewing.
 - 12:00 PM - Complimentary CAB meal.
 - 1:00 PM - Poss Angus Bull & Female Sale
- Following the sale, there will be a Certified Angus Beef prime rib meal with refreshments.

Everyone welcome!

GUARANTEE

Unconditional first breeding season guarantee against death or injury to all bulls. Breeding season is defined as the 90-day period following the first turnout of the bulls. Replacements are available, or if the buyer prefers, credit will be given in the following year's sale. Please notify us as soon as possible after injury and prior to the sale of the injured bull. All claims must be made by October 1st.

TERMS AND CONDITIONS

Poss Angus assumes no liability in case of an accident. All cattle will sell under the terms and conditions recommended by the American Angus Association.

SEMEN EVALUATION

Falls and coming two year olds have been semen evaluated and yearlings will have a breeding soundness evaluation done in early March by a qualified veterinarian. Bulls will be accompanied with proper certificates on delivery day.

TRUCKING

Bulls will be wintered until mid-March at which all bulls will be delivered within 400 miles free of charge.

HERD HEALTH

Bulls have been vaccinated for P13, BVD, BRSV, Haemophilus, Vibrio, Lepto and 7-Way. Bulls have also been wormed for internal and external parasites.

SEMEN INTEREST

Poss Angus will retain 1/3 interest in all bulls selling. Buyer has full possession and salvage value.

INSURANCE

Jared Mohnen of Dakota Ag Insurance will be providing mortality and infertility insurance
Jared Mohnen.....605-999-4475

VOLUME DISCOUNTS

Volume Discounts will be offered starting at 3 bulls (3%) and increasing 1% for each additional bull up to 10 bulls. Maximum discount of 10% offered.

Join us!
MAXIMIZING COW/CALF PROFITABILITY

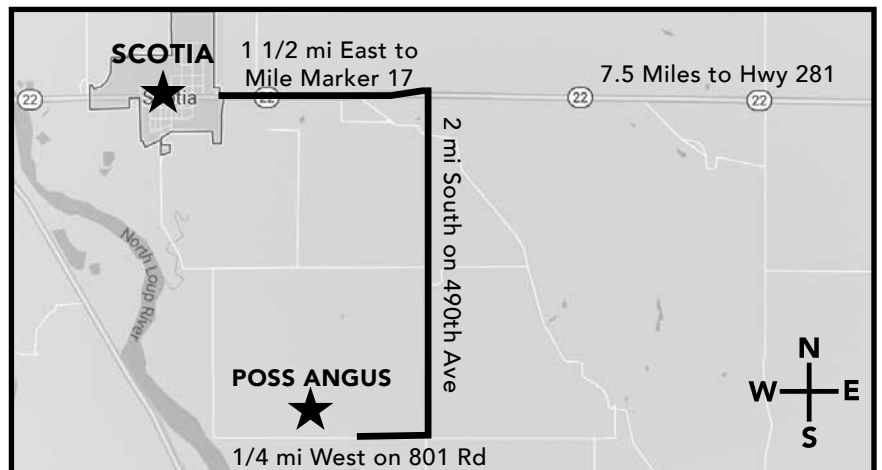

Allen Stateler, Ph.D.
Nutrition Services Associates

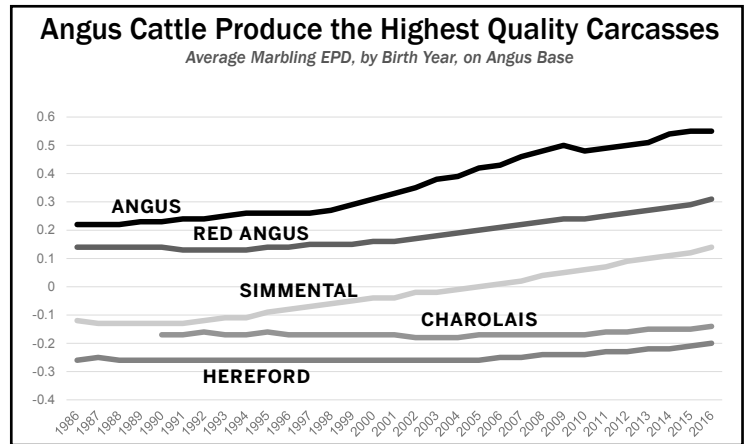

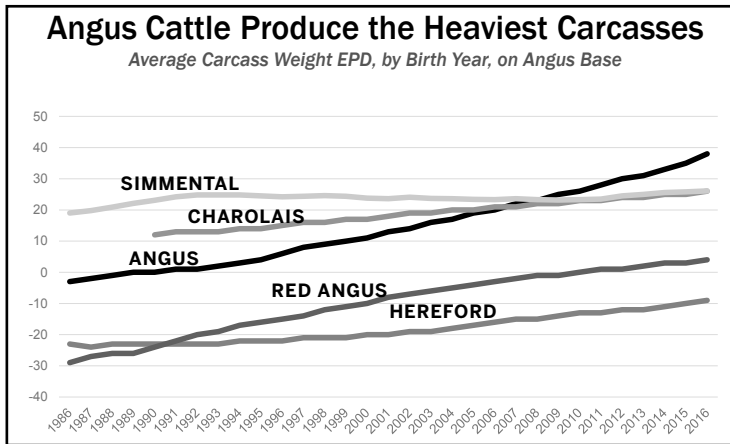

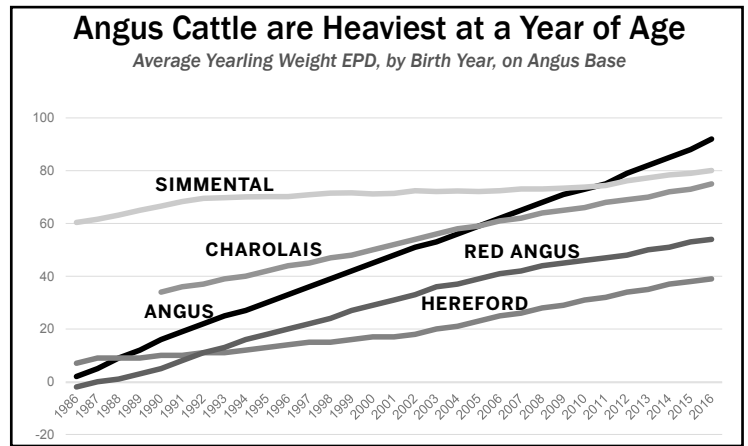

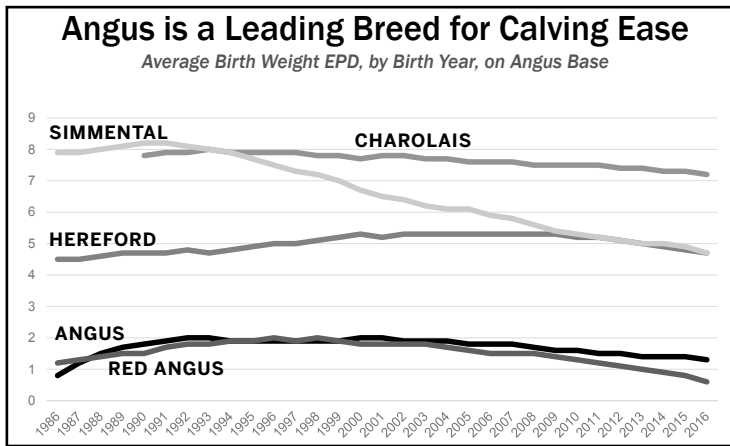

THURSDAY, JANUARY 31ST — 6:00 PM — POSS ANGUS

Allen Stateler earned his B.S. in Animal Science and M.S. in Ruminant Nutrition from the University of Florida and his Ph.D. in Ruminant Nutrition from South Dakota State University.

Dr. Stateler is interested in all aspects of beef cattle production. He has his own cow/calf operation and believes that being personally involved and invested in the cattle business makes him more aware of the problems and opportunities his customers face.

DIRECTIONS TO POSS ANGUS

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

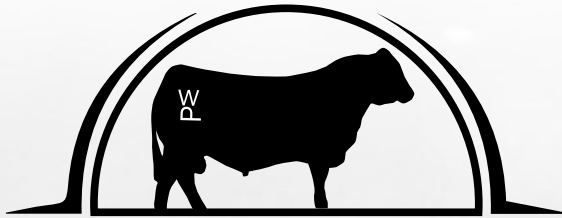

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

What a way to start off the sale! 8503 is one of the true genetic masterpieces ever raised at Poss Angus in every aspect of phenotype, pedigree, and EPD. This bull is a combination of the two greatest animals ever produced on the ranch. Throughout the last several years, we have had the opportunity to produce 10 AI Stud caliber sons of the rare Easy Impact, and needless to say this very well could be the best one yet. Easy Impact 8503 is one that has had the ability to put everything together since day one. With an outcross pedigree like this, you won't find a better genetic masterpiece. When you see him in person you will appreciate the amount of mass he has because of his depth of body, shape of rib, smooth shoulder and square hip that made him the #4 weaning weight bull of the calf crop. The thing that really sets this bull apart is his calm demeanor as well as the big hoof he carries, his symmetrical toes and depth of heel that is so hard to find anymore. The dam is the herd matriarch that currently has 23 daughters retained in the herd. A flush sister to 8503 is our most up and coming donor cow and one that we believe could leave a serious touch on our herd. 8503 will be used through AI at Poss Angus for years to come.

The 1682 progeny have exceeded expectations everywhere sold. This high volume, easy fleshing individual, has produced several sale toppers as well as AI Stud bulls. Few calving-ease bulls in Angus history have ever offered the extreme body mass and depth of body that is a trademark of 1682 and his progeny. Daughters in production display his depth of body and ease of fleshing with nice udder structure and a total brood cow look.

A real stud to start off the 1682 sire group that has been in high demand! Here is your chance to buy a 1682 brother from the same 4301 cow family as the \$730,000 VAR Power Play. Payweight 8514 has been a standout since day one here and has yet to let off the gas pedal. Never before have we raised a bull with so much mass, dimension, base width, and power and performance; but yet have the ability to put it all into a calving ease package in a moderate frame. 8514 is a bull that has set the standard high for creating AI stud caliber bulls, but one that you appreciate so much. Coming out as the #2 weaning weight bull of the entire calf crop, as well as the #1 \$W bull of the sale offering make this bull a must-see candidate. One of the top spread bulls of the offering and combination of his fault free phenotype make this guy one of a kind. The dam is a true sensation that comes from one of the most famous cows in the Angus breed. A cow family that has been tested time after time and always succeeded. If you're looking for a bull that has the ability to do it all here's your chance!

Another elite 1682 son here in Lot 3. The 1682 sons are the type that work in every segment of the cattle industry which is what makes them such a high demand. 8505 is no different but one that will offer a larger frame package without sacrificing quality. He is nice fronted with a complete long hip to him are what you will like not to mention how athletic he really is. Flush brothers sell as Lots 3-7 and 9. Dam is a total brood cow and one that will sweep you off your feet, she sells as Lot 174.

If you're looking for the total calving ease option out of 1682 here's your chance. Tied for second in the offering on CED, you won't have to worry about sacrificing growth and performance with this guy. A real moderate framed option with the type that will sire calves with sleep all night calving ease. Dam sells as a highlighted donor.

Another standout 1682 son with a big time spread from birth to yearling. 8507 is one of the most balanced bulls that ties together style and maternal excellence with a powerful and muscular profile. The dimension this bull offers will keep your eyes glued to him the whole time. A real unique bull that puts together 13 traits within the top 15% of the breed but sacrifices absolutely no phenotypical excellence. Backed by a solid donor dam that sells as Lot 174.

CALVING EASE STAR DESIGNATIONS
Our bulls have been sorted into four groups of calving ease stars.

- ★★★★ Heifer bull with excellent calving ease
- ★★★ Heifers and cows
- ★★ Best suited for young and mature cows
- ★ Best suited for mature cows

The consistency of the 1682 sons runs awfully deep, with this larger framed high growth bull. 8511 is a big time feedlot performance bull with carcass genetics. Sporting a high YW, SC, \$W, and \$B give this bull a solid set of numbers to back up his genetics. Look for this bull to create the feeding type of cattle that will excel all the way to the rail. Dam is the sale highlight Lot 174.

A balanced numbered son of 1682 with high growth. This bull was a standout as a calf and through the summer. Excellent \$Value's on a bull with outstanding maternal genetics. With eight traits in the top 15% of the breed, this bull is a typical Payweight son that does so much right. Dam is a larger framed, square made donor female by Irresistible. Big time growth and maternal genetics throughout this entire pedigree.

The quality of the 1682 sire group stays strong with 8519. A muscular bull that offers a nice shape of rib with lots of depth. You will also notice how muscular he is and how he sports a nice strong top that is hard to find in cattle with that much muscle and power. With 10 traits in the top 15% of the breed, this bull is a real herd sire candidate. His flush brothers resemble him with their consistency in lots 3-7.

Matthew 6:19-21

Welcome on behalf of Wes and myself to the 2019 Poss Angus Bull and Female Sale. Another year in seedstock production at Poss Angus brings a set of bulls and females that are raised the way they should be and push the envelope of production in many traits. They have raised the bar this year and it shows.

The Poss' search the country and Angus database on a monthly basis for genetics that compliment their approach, design and environment. This sale offering represents that continued focus that will separate their program and it's growing customer base. If you travel in the summer to visit cowherds, you will find few in the country that will show on grass better than the Poss herd. It is impressive! They are above average frame, deep, nice uddered and functional into their double-digit years. The word is starting to spread on this program and the genetic impact it is having. Take a look at the female offering in this sale and the heifers going to National Western Stock Show Foundation Female Sale. You will like what you see.

Many raised and purchased sires from this program have entered studs and/or major programs across the country with excellent success. This offering has more depth of genetics than any of the past sales we have worked with them on. Danny and the boys will assume some risk to advance the program and they are successful in their genetic decision making. The benefit of moderating birth weights, expanding early growth, improving end-product merit and securing maternal production traits will end up in the pastures of their customers. Take advantage of this hard work and dedication and you will be excited with the outcome.

As always at CK6, we vouch for the character of the people. Danny and Kristi's family is of high moral goals and they live it. That reflects on the data from the program and we believe it is the highest standard of success. If CK6 can be of any assistance, please feel free to contact us.

Chris Earl 630-675-6559 — Wes Tiemann 816-244-4462

God Bless, Chris Earl

A real powerhouse that continues to show how potent it was to flush the Easy Impact lineage back to 1682. 8524 is no exception based on his natural thickness and stoutness. This bull is also known for his remarkable base width as well as sure shot calving ease. Don't let his flush brother steal the show, this one is just as good in his own right. Dam is the Element daughter phenom that has been a cornerstone donor cow for us. Expect maternal siblings to highlight future sales.

A true stud out of the sensational flush from our high selling donor last year. 8527 is super unique in his own way with lots of performance. A real correct made bull that stands wide at the base and shows off mass and volume that you don't see every day. Top 25% for CED to top 2% on YW makes him a big-time spread bull that will give you carcass merit as well. Dam is a real masterpiece now serving as a donor for Jason Jagels.

A flush brother to Lot 11 is another solid bull. Calving ease with performance in a real moderate framed package that promotes muscle and base width. He may be a little younger than most of his brother's, but he's been right there with them all along. Watch for this guy to leave some great daughters with longevity.

A new flush of 1682 calves that are just as impressive as the ones preceding them. One of the top calving ease bulls as well as top weaning weight out of this flush. A top-notch bull right here that will give you extra length of body as well as extra power and performance. Dam was a featured donor lot on last year's sale and is now working in Tennessee for Darren Kilgore. A cow that produces calves with an extra amount of power and performance in an eye appealing package.

Teddy was purchased in 2017 from the Edgar Brothers program, when he became their record selling bull. The Teddy progeny have exceeded our expectations in terms of phenotype, growth, performance, eye appeal, and calving ease. Since the purchase of Teddy, he has proven to become a low birth weight, calving ease Resource son. His dam is one of the most beautiful cows in Ted Watson's herd, that is known for raising high performing cattle. The daughters on Teddy are his best feature yet. Because of their fleshing ability, sharp front, shape of rib, and unspeakable eye appeal; we have kept every heifer sired by Teddy.

Heavy muscled Teddy son with a big time spread on him. With a moderate frame to him, here's the type of bull that will get the job done. Dam is a good Ten X back to a no miss All Around daughter. With the Erica cow family on the bottom there is maternal excellence stacked in this pedigree.

A super thick heavy muscled Teddy son with base width. The Teddy calves are some of our favorites because of the amount of performance and eye appeal they put together, not to mention the calving ease he has proven to sire. Dam is a larger framed Uptown with some depth of body. Cow is from the same family that brought us Maverick, the high seller from last year.

One of the most intriguing bulls in the offering, with one of the most unique crosses. 8145 is a thick stout bull with apparent base width. When you lay eyes on him the amount of dimension and shape of rib he has will really catch your eye. With a number spread like this and the phenotype he's got in a moderate framed package, this guys an outlier in a league of his own. Stacking power on power with this cross made for a really unique opportunity right here. Dam is a bigger framed easy fleshing Easy Impact daughter with a big time spread. The females out of this one will be special.

Big time performance on this stand out Teddy son. This boy has been a standout since day one because of his pattern and performance that will catch your eye. With a good square hip, and added frame, this guy does it all. Heavier birth weight bull, but one that still has the calving ease capability. Ranking as the #2 bull in the offering for YW, \$Feedlot and \$Beef. Dam is a bigger framed Ten X that sells as lot 175.

Compass is turning out to be one of the greatest bulls ever purchased at Poss Angus. Cattle are built with perfect structure, eye appealing muscle expression, and the daughters are second to none. We have used Compass extremely hard the last two years, based on how incredible his daughters are. If looking to use a sire that will create daughters resembling Y69, use Compass and keep every single one!

A wide made, nice fronted bull that is one of the thickest, stoutest, heaviest muscled bulls ever raised at Poss Angus. It's hard to find a bull that portrays this much tone of muscle but is still nice fronted, and well put together like 832. When this bull walks you better look out, long strided and free moving; this boy's built like a freight train. Dam is a larger framed, promising first calf Zenith daughter out of a cow family built on longevity.

Playbook has been used across the nation as a top 1682 son that gives a little more frame than his sire, but one that does not compromise mass and structure. Playbook cattle have been very well received across the country, because of their phenotype. His dam is one of the most popular females in the Angus breed, stemming several generations back of consecutive high profile donor females.

A real crowd pleaser right here. Correct made all the way through his structure, that has excellent rib shape. Heavy muscled and a real sound made bull, that will be highly maternal. Dam is a no miss cow that is averaging \$15,000 on four bulls throughout the last four sales.

Colonel was the all-time high selling bull in the historic Baldrige Bros program when he brought 580,000 to an elite group of breeders. The Colonel calves are proving to be like their sire, lots of muscle expression put into a moderate framed attractive package. Daughters are sure to be good from the lineage of Y69.

A real big time herd bull right here! 822 is the combination of taking what we feel is two of the best cows and combining them together. This Colonel x Easy Impact was a great mating decision. A real moderate framed bull that has one of the most balanced set of numbers you will find anywhere on your travels. Lots of maternal excellence on every end of the pedigree. Dam is our most up and coming donor cow and is also a flush sister to the Lot 1 bull.

A real attractive bull that is larger framed and will add a little more bone mass to your cattle. This bull is one that will sire the right kind. Dam is a productive 10 year old cow that had the high selling bull in our 2012 bull sale, proof that she's done it before and she will do it again.

Revive was a feature of the Renown sire group at the 2017 SAV sale. Revive is an attractive, super-fronted bull with length, thickness, muscle shape and superior structure. Revive is a high performing bull that reads well on paper across the board. His dam is a beautiful Iron Mountain daughter who is a maternal sister to Hesston.

Element sold to 4M Angus and later sold an interest to Genex. Element has proved to be one of the top sure shot sleep all night calving ease bulls of the breed. Calves are born light and with extreme vigor that is hard to find. The growth in the Element cattle is evidently very rapid from the beginning. Daughters are proving to be one of our most consistent sire groups and have the highest nursing ratio as a sire group. Keep every one of these sharp fronted, square made, perfect uddered females.

One of the younger bulls in the offering, but one you will want to be sure to not pass up on. This attractive made bull is super sound with a powerful look. Big time growth and performance out of a cow that has never missed. His Total dam has been one of our top herd bull producers for the last five years.

A real powerhouse from the youngest bull in the offering. Lots of growth and carcass weight from this big framed bull. A maternal brother was a sale feature in last year's sale and is now working for Bernard Kamphaus. His 13-year-old dam proves that those old cows can still produce a good one. The daughters out of this bull will be ones that last forever based on the longevity of this cow family.

Easy Rider was the high selling bull of our 2016 sale, selling to Koberstein Farms and ST Genetics. Easy Rider is one of the most intriguing outcross spread bulls you will find, due to his impressive phenotype and eye catching numbers. The deceased dam of Easy Rider was one of our favorite cow's due to her consistency of producing herd sires and donor quality females.

A top notch Easy Rider fall bull that is one of the most powerful bulls to sell. Complete in his design, and one that offers so much boldness through his rib shape all the way to his rump structure. With this much eye appeal and performance, there is sure to be some darn good females that come out of this bull. His dam portrays the same amount of power and performance as her son; a very promising first calf Zenith daughter.

Resource has been one of the breeds most popular growth sires in the last 10 years. Standing in the top 5 for registrations year after year, his progeny are why people keep using him. The Resource cattle are built in a moderate framed package, that are second to none for growth and maternal excellence. The dam of Resource has been one of the most influential cows in the Angus breed.

Bodyguard was a feature on the 2016 sale, selling to Accelerated Genetics, Woodhill Farms, Baldrige Bros, and Lowery Land and Livestock. Bodyguard was one of the most complete bulls born at the ranch and his calves show it. Progeny are thick, stout, have a great look, and show tremendous muscle expression.

Sensation was the \$650,000 top selling bull at the 2016 Schaff Angus Valley sale in 2016. A bull that sires above average scrotal size and muscle. A balance trait bull with good structure and attractive design. Combining two of the all-time great females in the Angus breed, SAV Blackcap May 4136 and Madame Pride 0075.

Real attractive made son of the SAV Sensation to start off this new sire group. An outcross sire group that will bring added eye appeal and performance. 8502 is no different with his sharp front, great style with eye appeal. Lots of performance out of this bull. Dam is a larger framed, top notch, stylish Easy Impact that is a corner stone donor for us.

Wide based moderate framed bull that is easy fleshing. A real sound and soggy made bull. Dam is the great Blueblood 920. A maternal brother sells as Lot 1. Awesome opportunity to get great maternal genetics here.

Nate had a great opportunity to go to Stephenville, TX to learn from nine-time NFR qualifier Charly Crawford.

Willie was purchased on the 2012 Baldridge Bros. Sale, and we later sold an interest to Genex. Willie is believed to be one of the top sons of Waylon, because of his impressive phenotype, and is heavy muscled, square hipped, deep ribbed, and a smooth made beef bull with excellent feet and legs. Daughters are making gentle nice uddered females that are wide based and easy fleshing. Sons have topped numerous Baldridge and Poss sales that have gone on to do excellent work for many purebred and commercial operations. The dam is one of the top cows in the Jud Baldridge herd, that has raised Atlas and Optimum as well.

A dense made sure shot calving ease bull out of the growth and carcass sire Consent. This thick stout made bull is a heavily muscled bull that has a very balanced EPD profile in an extremely moderate framed package. Big time marbling and \$Weaning genetics here to pass on to his progeny. Dam is one of the ranch's most sought after cows and one that holds true carcass genetic capabilities.

An easy fleshing son by the popular Consent yet again. This smooth made bull has tremendous muscle mass that weaned off the cow very well. A bull with so much fore rib and eye appeal that boasts eight traits in the top 15% of the breed. Dam is an exceptional daughter by Western Cut out of the popular Blackcap cow family. Impressive maternal genetics here!

A calving ease option sired by the carcass-oriented Consent. This big spread bull has lots of style, as well as balance and eye appeal. A bull that will not only add growth but also add carcass genetics to his calf crop. A bull that doesn't lack a whole lot on his EPD profile. His dam is a top-notch Big Eye daughter out of the oldest living cow on the ranch, the 15 year old Erica 4602. This pedigree is built on longevity and this guy will be no different.

4505 has been an excellent calving easy option that will put the power and phenotype back into cattle. 4505 is one of the most correct footed bulls out there and also exhibits unreal muscle mass and shape of rib. Stemming back to the great Easy Impact as well as Right Answer on the bottom side, the pedigree is loaded with quality.

Another Western Cut bull to close out the offering. 8168 is a larger framed bull that will give you extra volume and mass. Look for this bull to give you some size and dimension to your calf crop. Out of a growthy Timeless daughter from a time tested cow family.

We appreciate our loyal customers and seeing you year after year!

7204 is the oldest bull in the two-year-old offering, and it shows in his heavy muscled, long bodied stature. This rugged bull is a double digit CED bull with excellent HP and Marb EPDs. Dam is one of the few All Around daughters left on the ranch, but she exemplifies the typical All Around daughter, just a good looking cow that produces good ones.

Poss Erica 327 is a true masterpiece that could very well be the greatest cow to ever step foot on the ranch. A cow that brings unspeakable phenotype to the table in a moderate framed package, with an unbelievable number spread to back it up. 327 is one that sports what many believe to be the best set of feet and structure they have ever seen, a real foot improver! Never before have we raised a cow with as much base width and power as this one right here. The mother of Achievement, that sold in our 2017 sale as the high seller, who is now an established member of the ABS roster and Sitz Angus herd sire lineup. Achievement has become a sleep all night calving ease bull with unbelievable growth and performance, while also siring great eye appeal; those traits are evident in his dam, 327. Several progeny will sell in the coming years out of this great cow. Now is your chance to get what very well could be the best Broken Bow daughter to sell anywhere in the country.

Selling open and ready to flush!

Poss Rita 528 is a one of a kind cow with a unique pedigree in today's world. The mother of Citadel, who was the third high seller in our record breaking sale last year, selling to Kramer Angus, Mead Farms, Dameron Angus, and Beef 360. Citadel was a balanced trait bull, with excellent foot structure, as well as a big-time performance bull with a calving ease base. 528 is a hard working cow that currently holds a WR of 2/112. Her most recent calf, sire by SAV Sensation has been retained in our replacement pen. Several ET calves will be born this spring out of this great cow. Truly a unique opportunity to get a cow that is not only a tremendous phenotype cow but also one that has excellent fertility, which is evident in her flush records.

Selling open and ready to flush!

For the second year in a row we have decided to let go of another outstanding Easy Impact daughter. The females by this bull are the type of cow you can build your herd around, and 5525 is no different. A fourth-generation donor cow with unspeakable potential. A cow that is built with so much mass and dimension, but yet shows her unique ability to pass on such great eye appeal to her progeny. This cow has tremendous depth and length of body, with perfect shape of rib, but yet so neatly fronted with superb eye appeal. Her herd bull prospects that sell as Lots 3-7 and 9; are evidence in the making of this cow's ability to produce such great cattle. True calving ease in this great cow that reads extremely well, and continues to get better as more data is turned in. This cow has led us in great fashion and we expect her to do the same for her future home.

If you're looking for a balanced trait cow with top of the breed numbers in every economically important category, this is the cow for you. If running an EPD sort on all of her EPDs, only two other cows in the entire breed can match her genetic potential. A real unique opportunity here to purchase a cow that not only has the ability to play the numbers game, but one that also has the ability to show off an excellent phenotype. A larger framed female that passes on unbelievable power and performance to her offspring. Her standout son by Teddy highlights the sale as Lot 26. This standout cow has been a reliable dam with excellent nursing capabilities having a WR of 2/109. Excellent shape of rib and depth of body, as well as what could be the longest sided cow to ever run our pastures.

Selling as pasture exposed to Baldrige Compass and Connealy Long Range from June 8th to August 8th, confirmed bred!

- The all time high selling bull at Poss Angus selling to Belvin Angus and Semex both of Canada. Maverick has become one of the most in demand bulls for semen sales within the last year.
- Sampled by some of the top seedstock operations in the country, and one that has become the most widely used bull in our program's history in just one year. Look for his calves to highlight several sales next year.
- Maverick was used so heavily because of his ability to put such an elite phenotype and set of EPDs all into one package.
- His dam is one of the most productive cows on the ranch, and she's got the track record to prove it. With a nursing ratio of 2/118, this cow will continue to be an integral part of our herd. Look for several ET calves in the next few years to highlight our sales.

- Blackout stole the scene on the record breaking Jindra Angus Bull Sale, when he became their all time high selling bull. We had the great opportunity to join forces with Alta Genetics and Koupal Angus to buy this great bull.
- Blackout was used just as much as Maverick within our herd last year, we expect a very large portion of this years calves to come from these two bulls.
- Blackout was so sought after because his incredible growth, stoutness, and soundness in a moderate framed package for an Acclaim son.
- Blackout also has an exceptional EPD profile that is tough to fault.
- His dam is a neat made GT Shear Force daughter working her way into Nick Jindra's donor pen.

- Long Range was selected as the third high selling bull on the 2018 Bull Sale from the world renowned Connealy Angus herd, purchased with Alta Genetics.
- Long Range was selected for his moderate frame, but contributing with his growth and performance, as well as carcass quality genetics.
- Sired by the rare and sought after Hoover No Doubt, we feel that Long Range could be one of the top candidates to continue his genetics.
- His dam is sired by the great Connealy Greeley, making this a unique pedigree with all the performance in the world.

- Achievement was the high selling bull on our 2017 sale going to Sitz Angus and ABS Global.
- Achievement is a fault free bull with a strong top, perfect feet, deep bodied, and wide based.
- Achievement is one of the top spread bulls in the ABS lineup, as well as one of the go to calving ease bulls.
- The first calves sired by Achievement are everything we hoped for. Just like their sire, they possess light birthweights, but then take off and grow like no other. Excellent muscle shape and pattern in these progeny.
- Dam highlights the donor division of our sale as lot 172.

- Marvel was the second high selling bull in last years sale going to Alta Genetics.
- Marvel was used back into our herd due to him being the highest performing and one of the most powerful bulls ever offered at Poss Angus.
- The highest IMF bull in last years offering and one that will improve that marbling trait.
- Dam is an excellent cow that had the ability to raise Marvel to a weaning ration of 125 while being a first calf heifer.

- Amplify was our selection on the Mogck & Sons Bull Sale last year, as the second high selling bull.
- Selected for his extreme calving ease, but still having the ability to sire the feeding type of cattle. Big time growth and performance created from his sire that has made the Enhance cattle so popular within the last year.
- A true outcross bull for our herd.
- Look for progeny to sell on next year's sale.

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 7-24 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	24	Docility	11
Birth Weight	13	Heifer Pregnancy	22
Weaning Weight	19	Mature Weight	16
Yearling Weight	24	Mature Height	7
Milk	14	Carcass Weight	7
Yearling Height	12	Carcass Marbling	8
Yearling Scrotal	16	Carcass Ribeye	11
Dry Matter Intake	17	Carcass Fat	12

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo or those of partnering labs Zoetis (HD50K, i50K) or GeneSeek (GGP-HD, GGP-LD). These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.
